From Data Collection to Submission

Are you looking for a simple approach to EDC?

Are you tired of technology vendors that don't understand your business requirements?

Are you seeking hidden efficiencies across the drug development lifecycle?

ViewPoint[®] FUSE is an integrated EDC software platform that is unmatched in the clinical trial software industry. This software/service combines innovative technology with Octagon's unparalleled expertise in the clinical data lifecycle. This strong technology platform was developed and is supported by industry thought leaders with practical experience that has been incorporated into the technology to provide a user-friendly solution. With ViewPoint FUSE, Octagon is leading the charge to change the way industry approaches the entire drug development lifecycle.

ViewPoint FUSE provides the following value innovations to our clients:

- Full functionality supported by expert implementation services, technical support and customized training programs
- Suite of 11 standard reports is included in base study
- Branded system allows for a unique look-and-feel without modifying code to extend a product or sponsor brand

- Quick implementation and protocol updates through programmable study configuration points in XML, C# and ASP.NET
- Live Subject Summary offers easy subject, visit, form and field-level management for data management, monitoring and site tasks through our one-click system
- Fully localized, down to the edit check messages, to allow for a standard method to cost-effectively translate the EDC system for multiple cultures
- Reduced database dependency, bringing page turn times to sub-seconds
- Clinical Rules Engine allows for a powerful method of specifying inter- and intra-visit scheduling, form workflow, queries and edit checks in one format
- Configurable workflow which invalidates any form with a data change and forces workflow to begin again
- Fully validated Base Study with 19 Standard Case Report forms
- System is built upon the principles of SDTM to streamline data on the back end
- Fully submission compliant eCRF PDF builder bookmarked for both CDER and CBER
- 24/7 Data export capability
