

FROM DATA COLLECTION
TO SUBMISSION

Q: Is your EDC solution lacking spark?

**FROM DATA COLLECTION
TO SUBMISSION**

BETTER DATA FASTER

Reduce setup time up to 50 % • Facilitate operational to SDTM compliant datasets • Submission compliant deliverables at end of trial

Are you looking for a simple approach to EDC?

Are you tired of technology vendors that don't understand your business requirements?

Are you seeking hidden efficiencies across the drug development lifecycle?

FUSE is an integrated EDC platform unmatched in the clinical trial software industry. Innovative, user-friendly and intuitive, FUSE is, simply put, the easiest-to-use. This strong technology platform was developed and supported by the practical expertise of Octagon's industry thought leaders. With FUSE, Octagon is leading the charge to change the way industry approaches the entire drug development lifecycle from data collection to submission.

FUSE provides the following:

- System built on SDTM principles to facilitate operational to submission compliant datasets
- Fully validated base study with 19 standard eCRF forms
- 24/7 Data Export
- Fully compliant PDF builder bookmarked for both CBER and CDER
- Suite of 11 standard reports included in base study
- Icon based workflow
- Automatic email notifications for overdue visits, Serious Adverse Events, and Clinically significant laboratory values
- Robust online edit checks
- Defined workflow and visit scheduling
- No software installation necessary
- Source document verification is integrated into the data cleaning process
- Branded system allows for a unique look-and-feel without modifying code
- Ability to display interface in native languages
- Expert implementation services, technical support and customized training programs

The logo for FUSE features the word "FUSE" in a bold, orange, sans-serif font. A blue, stylized wave or ribbon graphic curves underneath the letters.
